

Aerial Camera Services

Cinematic • FPV • Immersive • Micro

Specialist aerial camera unit providing traditional aerals, cinematic FPV, immersive 360 capture, and ultra■compact interior drone work for film, TV, commercial, and branded productions.

Cinematic Aerial Platform

Stable, repeatable aerial shots for establishing visuals, landscapes, and broadcast■friendly coverage. Designed for reliability, legality, and efficient shooting days.

Cinematic FPV Platform

Controlled FPV movement for interior fly■throughs, dynamic reveals, and follow shots. Flown with a camera■operator mindset prioritising safety, composition, and intention.

Immersive / 360 Platform

Full■sphere capture allowing reframing in post, immersive storytelling, and future■proof deliverables. Ideal for campaigns requiring maximum creative flexibility.

Micro Drone Platform

Ultra■compact drone solution for tight interiors and safety■sensitive environments. Enables human■scale movement in spaces unsuitable for larger aircraft.

How Productions Hire

Booked as a half■day or full■day aerial camera operator. Aircraft selected per shot requirements, allowing seamless transitions between exterior, interior, FPV, immersive, and micro■drone coverage.

Professional Standards

Fully insured commercial operations. Risk assessments, permissions, and safety■first workflows provided for every production.
